MIND-BLOWING STATS THAT SHOW THE NEED FOR A PROJECT AND INFORMATION MANAGEMENT SYSTEM

1 According to IDC, **the amount of data created and replicated globally is expected to reach 175 zettabytes by 2025, up from 33 zettabytes in 2018.** It's not IF a firm needs PIM, it's when. The longer an organization waits, the more data it will have to migrate, manage, and integrate into the new system.

2 **69% of projects go over budget by 10% or more while profits decrease by 3% due to rework because teams didn't have the latest information.** For every 1000 RFIs or Submittals, Newforma could save you up to 200 hours. Those saved hours generate ROI through high quality projects, on time and on budget.

3 **Newforma has over 50 integrations,** including Procore, Autodesk, and MS Outlook. Newforma is designed to fit into existing workflows, so you aren't changing how you work, just how fast you can work.

4 **Newforma has 2 key data security certifications,** ISO-27001 and SOC-2. Newforma customers can be assured that their data, passwords, and access are secure and protected.

5 **Newforma is used in 39 countries by over 100,000 firms of all shapes and sizes across the AECO industry.** From 5 person shops to huge corporations, Newforma can improve project delivery times and mitigate the risk of litigation.

Newforma provides modern and easy to learn software both on-prem and in the cloud that quickly provides a return on investment through on-time, on-budget project delivery. Rest easy knowing that no matter your firm's size or core competency, your data remains secure, and your employees can enjoy enhanced efficiency with no steep learning curve. Transform Chaos into Clarity with Newforma!
